AGRICULTURAL MARKETING SERVICE (AMS)  
FY 2002 PROCUREMENT FORECAST

The Agricultural Marketing Service (AMS) is a service-oriented organization that provides a vast array of marketing services to the agricultural industry. AMS' mission is to facilitate the strategic marketing of agricultural products in domestic and international markets while ensuring fair trading practices and promoting a competitive and efficient marketplace to the benefit of producers and consumers of U.S. food and fiber products. AMS functions and programs relate to the basic and complex process of moving food and farm products from producer to consumer. AMS administers numerous self-help programs such as marketing orders and agreements, and research and development programs, all of which help make marketing more orderly and efficient.

Standardization and grading programs are administered by AMS. Through its purchase of foods that are temporarily in excess supply, AMS also contributes to programs that improve the diets of the Nation's school children and the needy. AMS purchases Group A commodities for distribution in the National School Lunch Program as well as other domestic food nutrition assistance. Group A commodities include beef and pork products, salmon and tuna, poultry and egg products, fresh fruits and vegetables, canned and frozen fruits and vegetables, and canned fruit juices. These items are purchased on a weekly basis for distribution throughout the school year. Some commodities are purchased on an as-needed basis. Announcements and Invitations are issued and offers are received and analyzed. Contracts are awarded on a least-cost basis for each Announcement and Invitation. A portion of the requirements are set-aside for competition among small businesses only, and additional requirements are set-aside for firms which are 8(a) certified. AMS Food Purchase Reports can be obtained through the world wide web via the AMS Home Page at <http://www.ams.usda.gov/fp/index.htm>.

A Standard Form 129 (Solicitation Mailing List Application) should be forwarded to the following OSDBU Coordinators to be included in their Bidders Mailing List:

Group B commodities purchased by the Farm Service Agency (FSA) include price support items such as rice, cereal, soybean salad oil, shortening, peanut granules, roasted peanuts, peanut butter, rolled oats, rolled wheat, corn grits, bulgur, cornmeal, macaroni, infant formula, evaporated milk, and all types of flour. At times, some of these items are purchased only out of Commodity Credit Corporation (CCC) inventory. Various other commodities are purchased by FSA on a competitive bid basis. All announcements for processed commodities include provisions for competition among small businesses only (total set-asides). Awards for 8(a) certified firms are also set-aside. Standard Form 129 should be forwarded to:

MARKETING AND REGULATORY PROGRAMS (MRP)  
Animal and Plant Health Inspection Service (APHIS)  
FY 2002 Procurement Forecast

The mission of Marketing and Regulatory Programs is to facilitate the domestic and international marketing of U.S. agricultural products and to ensure the health and care of animals and plants while improving market competitiveness and the economy for the overall benefit of both consumers and American agriculture.

**The Marketing and Regulatory Programs are comprised of the following agencies:**

Agricultural Marketing Service (AMS)  
Animal and Plant Health Inspection Services (APHIS)  
Grain Inspection, Packers, and Stockyards Administration (GIPSA)

**Contracting Procedures & OSDBU Information:**

Products and services are procured primarily through the APHIS Headquarters procurement activity, Riverdale, Maryland, and the Field Servicing Office, Minneapolis, Minnesota. APHIS contracts for construction and maintenance of large and small buildings and incinerators, Federal Information Resources, equipment, supplies and services. This is accomplished through the utilization of small business set-asides, the 8(a) program, and competition.

For information on specific processes or procurement, please contact Norita Wallace, MRP OSDBU Coordinator at (202) 720-8665 or e-mail ([Norita.L.Wallace@usda.gov](mailto:Norita.L.Wallace@usda.gov))

AGRICULTURAL RESEARCH SERVICE (ARS)  
2002 PROCUREMENT FORECAST**

## **FY 2002 PROCUREMENT FORECAST**

### **Research, Education, and Economics**

#### **Agricultural Research Service (ARS)**

ARS is the designated contracting activity for the Research, Education, and Economics (REE) mission area agencies (Cooperative State Research, Education, and Extension Service (CSREES), Economic Research Service (ERS), and National Agricultural Statistics Service (NASS)). In support of these agencies, ARS procures a wide variety of supplies, services, and equipment. In addition, major construction activities such as small buildings, greenhouses, repair, maintenance, and energy retrofitting are procured by ARS.

ARS is responsible for developing through basic, applied, and developmental research, new knowledge and technology which will ensure an abundance of high quality, nutritious, reasonably priced food and other agricultural products to meet domestic and world needs while maintaining natural resources and environmental quality.

Purchasing is accomplished at the lowest level possible in ARS and over 100 decentralized locations throughout the United States to maintain operational support close to the mission activity units. Most items and services described above are purchased through the competitive bid process (i.e., sealed bids or negotiated procurements, which may be set-aside for small or HUBZone businesses). Federal Supply Schedule contracts are also a significant source of supplies.

#### **Cooperative State Research, Education, and Extension Service (CSREES)**

The goal of CSREES is to strengthen Federal, State, and local partnerships in research, education, and extension activities. CSREES facilitates the advancement of science and technology in the nationwide agricultural research system by providing federal resources, participating in cooperative program planning and evaluation, including developing a forum for coordination between State Agricultural Experiment Stations, USDA, and Federal research scientists. Responds educationally to critical national issues affecting food and agricultural systems.

#### **National Agricultural Statistics Service (NASS)**

The National Agricultural Statistics Service (NASS) gives coordinated leadership to statistical reporting, research, and service programs of USDA. It provides a channel for the orderly flow of statistical intelligence about the agricultural economy and the country. The primary responsibilities of NASS are the national and state crop and livestock estimates including coordination and improvement in the USDA's statistical requirements.

#### **Economic Research Service (ERS)**

The Economic Research Service (ERS) develops and carries out a program of economic research designed to benefit farmers and the general public. The findings of this research are made available to farmers and others through research reports and through economic outlook and situation reports on major commodities, the national economy, and the international economy.

**2002 PROCUREMENT FORECAST**

## FOOD AND NUTRITION SERVICE FORECAST OF FY 2002 PROCUREMENT OPPORTUNITIES

The mission of the Food and Nutrition Service (FNS) is to provide children and needy families better access to food and a more healthful diet through its food and nutrition assistance programs and comprehensive nutrition education efforts.

FNS primarily contracts for food stamp coupon production, storage and distribution, information technology resources, such as hardware, software, support services and maintenance, and advertising and marketing services. Federal assistance support is also provided via competitive grant awards for Program demonstration projects, such as Food Stamp Program outreach and nutrition education.

Agency awards are made using a range of vehicles, including contracts, modifications to exercise contract options, GSA's Federal Supply/Service Schedules, Government-wide Agency Contracts, grants, cooperative agreements and interagency agreements. To the maximum extent practicable competitive acquisitions will be set-aside to small, small disadvantaged, small woman-owned, and HUBZone small business concerns. A reasonable portion of the Agency's acquisitions will also be set-aside to the Small Business Administration's 8(a) Program. In the event GSA Federal Supply Multiple Award Schedules are used, primary consideration will be given to small businesses.

The Agency's FY 2002 Acquisition Forecast is provided below. Other opportunities will be added to the forecast, as they become available. For updated information, visit our Home Page often at <http://www.fns.usda.gov/fns> and click on "contracts and grants". Also, beginning in December 2001, visit "What's New" to register for our Small Business Round Table Events.

The Farm Service Agency of the U.S. Department of Agriculture ensures the well-being of American agriculture and the American public through efficient and equitable administration of farm commodity, farm loan, conservation, environmental, emergency assistance, domestic and international food assistance, and international export credit programs.

**MISSIONS OF THE PROCUREMENT FUNCTIONS**  
**COMMODITY OPERATIONS**

- **Export Products**

The Export Operations Division performs acquisition requirements in a timely and accurate manner, procuring and delivering commodities as requested in an efficient manner while minimizing both the risk of loss and expense to the program.

- **Bulk Grain**

The Bulk Grain Division buys or otherwise acquires, sells, exchanges, or disposes of whole grains, oilseeds, seeds, or bulk commodities, in accordance with program objectives and authorized directives.

- **Domestic Products**

The Dairy and Domestic Operations Division is responsible for the purchasing, processing, selling, inventory management, and distribution of various processed commodities for numerous domestic distribution programs. Storage agreements are established and maintained for the storage of processed commodities.

- **Transportation**

The Traffic Management Division (TMD) arranges for transportation of agricultural commodities to meet domestic and export program needs. TMD assists other operating divisions by providing transportation rates to assist in implementing programs and/or awarding contracts.

**AGENCY VISION**

***Domestic:*** We help sustain a healthy, vibrant, and economically viable American agricultural economy.

***International:*** We help American producers to be the world's most reliable supplier of high quality agricultural products.

**GENERAL GOAL**

Commodity Operations will improve the effectiveness and efficiency of CCC's commodity acquisition, procurement, storage, and distribution activities to support domestic and international food assistance programs, and administer the U.S. Warehouse Act.

FY 2002 Procurement Forecast**

The U.S. Department of Agriculture, Food Safety and Inspection Service (FSIS) ensures that the nation's commercial supply of meat, poultry, and egg product is safe, wholesome, and correctly labeled and packaged. FSIS has approximately 8000 employees in slaughter and processing plants, technical service laboratories, and district and compliance offices nationwide. An additional 2000 employees oversee administrative responsibilities and policy from the USDA headquarters in Washington, DC. The procurement staff handles all procurement activities, including simplified acquisitions and contracts from a centralized office in Beltsville, MD.

**2002 PROCUREMENT FORECAST**

**USDA Forest Service  
FY 2002 Procurement Forecast**

The Forest Service manages the National Forest System, which comprises 155 National Forests and 19 National Grasslands. The agency provides leadership and financial and technical assistance to non-Federal landowners, processors of forest products, urban forestry, and international forestry interests, to encourage the protection of the environment and the wise use of natural resources on non-Federal and international lands.

The Forest Service also carries on basic research to bring about better protection from fire, insects, and diseases to increase productivity and to facilitate full use of forest, water, and range resources and more profitable production of timber and forage.

In addition, the Forest Service through cooperative efforts with other countries, promotes the sound management and conservation of natural resources to meet human needs while protecting environmental quality.

Procurement contracts are awarded in the U.S. Forest Service in the support of forest management, protection, and utilization. Programs supported include: forest research, state and private forestry, cooperative and resource protection, and cooperative renewable resource management and utilization. The Forest Service is a decentralized agency that purchases goods and services at the local level. The majority of the products and services needed are procured using set-asides for small business concerns. The names of the OSDBU coordinators in each Regional and National Forest office are provided to encourage vendors to market their services to the level where most of the procurements take place.

**2002 PROCUREMENT FORECAST**

**OFFICE OF INSPECTOR GENERAL  
FISCAL YEAR 2002  
FORECAST OF PROCUREMENT OPPORTUNITIES**

The Office of Inspector General (OIG) was legislatively established by the Inspector General Act of 1978 and is operationally independent of other agencies of the Department. It is a relatively small, staff-intensive agency whose primary mission is to conduct and supervise audits and investigations relating to programs and operations of the Department of Agriculture.

OIG's Contract and Procurement Branch issues all contracts and purchase orders for the agency. Requests for supplies and services supporting OIG's operations are usually satisfied on a competitive basis after formal advertising. Acquisitions that can be set-aside for small businesses and/or 8(a) certified firms are routinely done so.

The following forecast of procurement opportunities for FY 2002 is projected at this time, contingent on availability of funds. Other requirements may be needed during the year but cannot be identified at this time.

Requests to be placed on the mailing list should be submitted on Standard Form 129 to Tina M. Jones, OIG's Office of Small and Disadvantaged Business Utilization Coordinator, at the following address:

## **FY 2002 Procurement Forecast**

### **Rural Development**

The Rural Development mission area strives to improve the quality of life in rural America by providing financial assistance and leadership to rural communities through partnerships, empowerment programs, and technical assistance. By targeting programs to selected populations and conducting extensive outreach efforts, Rural Development is able to reap the maximum return on its investment. The Rural Development mission area houses and coordinates programs that are related to rural economic and community development. Led by an Under Secretary of Agriculture for Rural Development, these programs are administered through three agencies and additional program offices:

- Rural Housing Service (RHS)
- Rural Utilities Service (RUS)
- Rural Business-Cooperative Service (RBS)
- Office of Community Development (OCD)
- National Sheep Industry Improvement Center

The following programs and services are provided through Rural Development's network of National, State, and local offices:

#### **Rural Housing Service (RHS)**

RHS programs help finance, repair, or relocate housing for moderate, low, and very low income families each year. It also provides rental assistance to multi-family housing projects, loans and grants for farm labor housing, and financing for essential community facilities, with a priority on health and safety concerns. RHS makes funds available to municipalities, counties, special-purpose districts, Indian tribes, and non-profit organizations to construct, expand, or repair community facilities serving rural areas.

#### **Rural Utilities Service (RUS)**

RUS helps to improve the quality of life in rural America through a variety of loan and grant programs for electric energy, telecommunications, and water and waste disposal projects (including solid waste disposal and storm drainage). In addition, RUS manages environmental assessment programs and training to support its many projects throughout the nation.

#### **Rural Business-Cooperative Service (RBS)**

RBS works in partnership with public, private and cooperative resources to provide technical and financial assistance, and business management services to rural America. It also conducts research into rural economic issues, provides cooperative educational materials to the public, and helps rural residents form new businesses.

#### **Office of Community Development (OCD)**

OCD steers the Empowerment Zones and Enterprise Communities (EZ/EC) program serving economically depressed areas. Through innovative programming, it develops strategic plans to forge alliances among private, public, and nonprofit entities.

#### **National Sheep Industry Improvement Center**

The National Sheep Industry Improvement Center researches and markets the sheep industry in the United States. To assist in achieving Rural Development's mission efficiently and effectively, Rural Development has procurement offices in Washington, DC; St. Louis, Missouri; and at State, District, and County Office locations throughout the United States.

## PROCUREMENT OFFICES (Field Locations)

A directory of State Office points of contact for procurement and contracting requirements is provided as an attachment to the Procurement Forecast. Small business company representatives should contact the appropriate State Office/National Office official who represents the state(s)/territories in which they are interested in pursuing procurement and contracting opportunities. Some offices have collateral responsibility for the procurement functions of other states/territories. Companies seeking business opportunities in Connecticut, Rhode Island, Maryland, New Hampshire, the Virgin Islands, or Puerto Rico should call the lead procurement office listed below:

<u>Lead Procurement Office</u> Massachusetts State Office Rhode Island Vermont State Office Florida State Office	<u>Collateral Procurement Regions</u> <u>Connecticut</u> <u>New Hampshire</u> <u>Virgin Islands</u> <u>National Office Puerto Rico</u>
--	--

For business opportunities in the West Pacific, the Hawaii State Office should be contacted. Individuals at that office will provide points of contacts for regions under their jurisdiction.

Rural Development's Procurement Forecast is not all inclusive. It lists simplified acquisitions (<\$100,000) as well as formal contracts >\$100,000), including subcontracting dollars to be awarded under prime contracts in FY2002. It does not include actions using the Government purchase card or non-appropriated funds. It does not include actions that would be purchased through mandatory sources of supply, or reimbursable agreements. The projected procurements listed are contingent upon the availability of funding.
